Data security awareness

v2.6

Before you add Read AI: protect university data

Everything said in the meeting may be recorded, transcribed and shared. These simple rules reduce the risk of a data leak.

Do

- Tell participants the meeting is being recorded and summarized.
- Review the summary before sharing or approving it.
- Share the report manually with the right people only.
- Delete reports you no longer need.
- Follow the university's data classification policy.

Don't

- Don't use it in confidential, HR or finance meetings.
- Don't record discussions involving student records or personal information.
- Don't share reports with external parties without approval.
- Don't rely on the automated summary without reviewing it.

If the discussion turns sensitive

Remove Read Assistant from the meeting right away before continuing.

Book a Coffee with IT session — just 10 minutes

Practical examples of using meeting-recording tools safely.

In person at IT | Remote via Zoom
